Attachments: [MOU_MayCreekLandfillSite_redlined.docx](#)

Hi Kris and Mark,

I've attached a redline version of the MOU with the changes from King County and Ecology's changes. The only suggested change we added was clarifying that the amount of sampling will be determined by the Parties. With cleanup sites, it is common to reduce or eliminate a need to continue groundwater sampling after four clean quarters, so we wouldn't want the MOU to anticipate continued sampling for the entire two years if the parties agree the data collection is not necessary.

I've added a contact person for Ecology but am confirming with the agency – I'll let you know if that name changes. Let me know if there are any questions. Thanks so much for working on this,

Ivy

Kris and Ivy:

Attached is an revised version of the MOU with King County's changes. Our discussions with Ecology have been about sampling/closure of groundwater monitoring wells after two years. We very much appreciate EPA's willingness to perform a thorough site investigation and assessment. The County is open to further discussion depending on the results of the site investigation/assessment.

Thank you for preparing the MOU.
